

M12M Starter Kit

This dual port, M12M development board (no enclosure) is suitable for laboratory testing of the M12M and M12M Timing GPS receivers. On-board LEDs indicate Power On, TXD, RXD, 1PPS, and DGPS In.

The M12M Starter Kit consists of an M12M development board; M12M GPS receiver; Power Supply Kit, 9VDC Out, 100-264VAC Input; Active GPS Antenna; and Standard 9 pin serial cable. USB option available in place of Standard 9 pin serial. Contact a Synergy Systems, LLC representative for details.
