

Timing1000

The Timing 1000 is a GPS antenna optimized for fixed location timing applications.

Key features include:

- Compact polycarbonate radome with water/weatherproof physical construction
- Directly replaces the discontinued Panasonic Marine II antenna
- 1"-14 marine mount allows cable to be routed through the support pipe protecting it from environmental damage.
- Dual filtered, high gain of 30dB and low current of 27mA.
- Bulkhead TNC connector or N Connector
