

SynTAC for Windows

SynTAC for Windows is a Synergy Systems, LLC software product for test and evaluation of Motorola, i-Lotus ONCORE, and Synergy GPS/GNSS based products using Windows NT, 2000, XP, Windows7, and Windows10, 32 and 64 bit systems. SynTAC automatically recognizes and initializes new 12 channel versions of iLotus M12M Oncore GPS receivers produced since 2006, Synergy's SSR Series GPS and Multi-GNSS receivers, and legacy 6, 8 and 12 channel Motorola GPS receivers dating from 1992 to 2005.
