

Software

SynTAC for Windows is a Synergy Systems, LLC licensed software product for test and evaluation of Motorola, i-Lotus ONCORE, and Synergy GPS/GNSS based products using Windows NT, 2000, XP, Windows7, and Windows10, 32 and 64 bit systems. SynTAC automatically recognizes and initializes new 12 channel versions of iLotus M12M Oncore GPS receivers produced since 2006, Synergy's SSR Series GPS and Multi-GNSS receivers, and legacy 6, 8 and 12 channel Motorola GPS receivers dating from 1992 to 2005.

To install SynTAC, Download the installation file SyntacS.exe by clicking the icon below then execute the file on your computer. The download software is for valuation purposes and expires after 30 days. SyntacS.exe will also automatically upgrade registered copies of previous releases to the latest version. Latest SynTac Software Version 2.7.22, Revised February 19, 2017
